

Question		Answer
1	If $k = -3$, $2k^2$ is:	
2	From the diagram, $\sin \theta$ is equal to: 	
3	In $\triangle PQR$, $\angle PQR = 70^\circ$ and $PQ = QR$. $\angle PRQ$ is: 	
4	$y = -\frac{x}{6}$ is the equation of:	
5	The volume of this solid is: 	
6	The gradient of the line joining $(3, -2)$ to $(5, 6)$ is:	
7	$6^0 + 2x^0$ is equal to:	
8	P is the point $(1, 4)$ and Q is the point $(5, 1)$. The distance between P and Q is: 	
9	If $\cos \theta = 0.758$, then θ , to the nearest degree, is:	
10	Multiple Choice P is the point $(-2, 8)$ and Q is the point $(4, 2)$. The midpoint of PQ is: A $(1, 3)$ B $(1, 5)$ C $(3, 3)$ D $(3, 5)$
